INDEX TO VOLUME 25[1]

AUTHOR INDEX

Abbott, B. J. *See* Leiter, Abbott, and Schepartz, Part 2, 1
——. *See* Leiter, Abbott, and Schepartz, Part 2, 207
——. *See* Leiter, Abbott, and Schepartz, Part 2, 522
——. *See* Leiter, Abbott, and Schepartz, Part 2, 1077
——. *See* Leiter, Abbott, and Schepartz, Part 2, 1253
——. *See* Leiter, Abbott, and Schepartz, Part 2, 1433
——. *See* Leiter, Abbott, and Schepartz, Part 2, 1626
——. *See* Leiter, Abbott, and Schepartz, Part 2, 1779
Abraham, S., and Chaikoff, I. L. Metabolism of Barrett mammary adenocarcinoma: glucose utilization, fatty acid synthesis, and terminal oxidative patterns and glutamine synthesis, 647
Adams, H. R. *See* Busch, Lane, Adams, DeBakey, and Muramatsu, 225
Adams-Mayne, M. *See* Ward, Putch, and Adams-Mayne, 1781
Adamson, R. H. *See* Henderson, Adamson, Denham, and Oliverio, 1008
——. *See* Henderson, Adamson, and Oliverio, 1018
Agostino, D., and Cliffton, E. E. Organ localization and the effect of trauma on the fate of circulating cancer cells, 1728
Albrecht, A. M. *See* Biedler, Albrecht, and Hutchison, 246
Alexander, P. *See* Goldenberg and Alexander, 1401
Algard, F. T. Characteristics of an androgen/estrogen-induced, dependent leiomyosarcoma of the ductus deferens of the Syrian hamster. II. *In vitro*, 147
——. *See* Kirkman and Algard, 141
Algire, D. H. *See* Spencer, Algire, and Smith, Part 2, 639
Ali, J. *See* Bertalanffy, Schachter, Ali, and Ingimundson, 685
Ambrus, C. M. *See* Ambrus, Ambrus, Pickren, Feltz, and Back, 609
——. *See* Bardos, Ambrus, Chmielewicz, Penny, and Ambrus, 1238
Ambrus, J. L., Ambrus, C. M., Pickren, J. W., Feltz, E., and Back, N. Selective protection of the gastrointestinal tract against radiation injury by perfusion with MEG (2-mercaptoethylguanidine hydrobromide), 609
——. *See* Bardos, Ambrus, Chmielewicz, Penny, and Ambrus, 1238
——. *See* Fiel, Bardos, Chmielewicz, and Ambrus, 1244
Amiel, J. L. *See* Mathé, Amiel, Schwarzenberg, Cattan, and Schneider, 1525
Angervall, L., Björntorp, P., and Stener, B. The lipid composition of hibernoma as compared with that of lipoma and of mouse brown fat, 408
Arison, R. N. *See* Shonk, Arison, Koven, Majima, and Boxer, 206
Arrhenius, E. *See* Hultin and Arrhenius, 124
Asano, M. *See* Cosgrove, Davis, and Asano, 938
Atchison, R. W. *See* Yohn, Hammon, and Atchison, 484
Attia, M. A., DeOme, K. B., and Weiss, D. W. Immunology of spontaneous mammary carcinomas in mice. II. Resistance to a rapidly and a slowly developing tumor, 451

Back, N. *See* Ambrus, Ambrus, Pickren, Feltz, and Back, 609
Baker, H. *See* Hoogstraten, Baker, and Gilbert, 1933
Baker, W. H. *See* Kelley and Baker, 1190
Balis, M. E. *See* Salser and Balis, 539
——. *See* Salser and Balis, 544
Balls, M. The incidence of pathologic abnormalities, including spontaneous lymphosarcomas, in a laboratory stock of Xenopus (the South African Clawed Toad), 3
——. Further aspects of lymphosarcoma in Xenopus (the South African Clawed Toad), 7
Balsiger, R. *See* Burchenal, Gregg, Lancaster, Hirt, Berchtold, Fischer, and Balsiger, 469
Bardos, T. J., Ambrus, J. L., Chmielewicz, Z. F., Penny, A. G., and Ambrus, C. M. Biochemical parameters of neoplasia. I. "Priming" activity of deoxyribonucleic acid from normal and neoplastic human tissues in a deoxyribonucleic acid polymerase system, 1238
——. *See* Fiel, Bardos, Chmielewicz, and Ambrus, 1244
Baserga, R. The relationship of the cell cycle to tumor growth and control of cell division: a review, 581
Battista, S. P. *See* Kensler, Palm, Day, Battista, Rogers, Yesair, and Wodinsky, 1622
Bauer, J. M. *See* Wu, Roberts, and Bauer, 677
Becker, A. J. *See* Bruchovsky, Owen, Becker, and Till, 1232
Bell, C. *See* Hilf, Michel, Bell, Freeman, and Borman, 286
——. *See* Hilf, Michel, Silverstein, and Bell, 1854
Bell, P., Jr. *See* Gottschalk, Bell, and Miller, 911
Berchtold, R. *See* Burchenal, Gregg, Lancaster, Hirt, Berchtold, Fischer, and Balsiger, 469
Berenblum, I. *See* Cividalli, Mirvish, and Berenblum, 855
Bergel, F., and Harrap, K. R. Future possibilities for the development of treatments of leukemia, 1643
Berliner, D. L. Studies of the mechanisms by which cells become resistant to corticosteroids, 1085
Bernard, J. Long duration of complete remissions in acute leukemia, 1673
——. **Boiron, M., Lortholary, P., and Levy, J-P.** The very acute leukemias, 1675
Bernecky, J. *See* Isojima, Bernecky, Planinsek, Yagi, and Pressman, 968
Bernhard, W. *See* Lapis and Bernhard, 628
Bertalanffy, F. D., Schachter, R., Ali, J., and Ingimundson, J. C. Mitotic rate and doubling time of intraperitoneal and subcutaneous Ehrlich ascites tumor, 685
Bertin, B. A. *See* Sinkovics, Bertin, and Howe, 624
Bertino, J. R. Current studies of the folate antagonists in patients with acute leukemia, 1614
Biedler, J. L., Albrecht, A. M., and Hutchison, D. J. Cytogenetics of mouse leukemia L1210. I. Association of a specific chromosome with dihydrofolate reductase activity in amethopterin-treated sublines, 246
Biggs, M. W., and Eiselein, J. E. Diffusion chamber studies of allogenic tumor immunity in mice, 1888
Billingham, R. E. Summary of the informal discussion of genetic factors in the etiology of cancer, 1336
Bingham, E. L. *See* Horton, Bingham, Burton, and Tye, 1759
Birbeck, M. S. C., and Wheatley, D. N. An electron microscopic study of the invasion of ascites tumor cells into the abdominal wall, 490
Björntorp, P. *See* Angervall, Björntorp, and Stener, 408
Blanz, E. J., Jr. *See* French and Blanz, 1454
Blobel, G. *See* Webb, Blobel, Potter, and Morris, 1219

[1] In addition to the regular issues of *Cancer Research*, 9 supplements were published as Part 2, in Vol. 25, during 1965. Such entries are designated by "Part 2" preceding the page number in both Author and Subject Indexes.

Bloch-Frankenthal, L., Langan, J., Morris, H. P., and Weinhouse, S. Fatty acid oxidation and ketogenesis in transplantable liver tumors, 732

Blomgren, S. E., Wolberg, W. H., and Kisken, W. A. Effect of fluoropyrimidines on delayed cutaneous hypersensitivity, 977

Bodey, G. P. *See* Frei, Levin, Bodey, Morse, and Freireich, 1511

Boiron, M. *See* Bernard, Boiron, Lortholary, and Levy, 1675

Bois-Svensson, I. *See* Sylvén and Bois-Svensson, 458

Boohar, J. *See* Heidelberger, Boohar, and Kampschroer, 377

Booth, B. A. *See* Sartorelli and Booth, 1393

Borman, A. *See* Hilf, Michel, Bell, Freeman, and Borman, 286

Bowdon, B. J. *See* Wheeler and Bowdon, 1770

Boxer, G. E. *See* Shonk, Arison, Koven, Majima, and Boxer, 206

——. *See* Shonk, Morris, and Boxer, 671

Boyse, E. A. *See* Old, Boyse, and Stockert, 813

Bradner, W. T., and Pindell, M. H. Strain specificity of stimulated regression of Sarcoma 180, 859

Breslow, L. Introductory remarks—conference on epidemiologic approaches to cancer etiology, 1275

——. Closing remarks, 1390

Brobst, D. F., and Olson, C. Histopathology of urinary bladder tumors induced by bovine cutaneous papilloma agent, 12

——. *See* Olson, Pamukcu, and Brobst, 840

Brockman, R. W. Resistance to purine antagonists in experimental leukemia systems, 1596

Brown, B. L. *See* D'Angio, Maddock, Farber, and Brown, 1002

Brown, G. B., Sugiura, K., and Cresswell, R. M. Purina *N*-oxides. XVI. Oncogenic derivatives of xanthine and guanine, 986

Brown, R. R. *See* Bryan, Morris, and Brown, 1432

Bruchovsky, N., Owen, A. A., Becker, A. J., and Till, J. E. Effects of vinblastine on the proliferative capacity of L cells and their progress through the division cycle, 1232

Bryan, G. T., Morris, C. R., and Brown, R. R. Absorption of ^{14}C-labeled 3-hydroxy-L-kynurenine and 3-hydroxyanthranilic acid from the mouse urinary bladder under carcinogenic conditions, 1432

Bryan, W. R. Formal discussion of: a survey of the tumor virus problem from an epidemiologic standpoint, 1283

Bukovsky, J., and Roth, J. S. Some factors affecting the phosphorylation of thymidine by transplantable rat hepatomas, 358

Bulbrook, R. D., and Hayward, J. L. The possibility of predicting the response of patients with early breast cancer to subsequent endocrine ablation, 1135

——. *See* Hayward and Bulbrook, 1129

Bullough, W. S. Mitotic and functional homeostasis: a speculative review, 1683

Burchenal, J. H., Gregg, V. C., Lancaster, S. P., Hirt, R., Berchtold, R., Fischer, R., and Balsiger, R. Prevention by sulfonic and phosphoric analogs of the terephthalanilide inhibition of leukemia P815Y *in vitro*, 469

—— **and Murphy, M. L.** Long-term survivors in acute leukemia, 1491

——. *See* Kreis, Ellison, Lyman, and Burchenal, 402

Burke, W. T., and Gangloff, E. C. Metabolic profiles during carcinogenesis and related conditions in hepatic tissue, 833

Burton, M. J. G. *See* Horton, Bingham, Burton, and Tye, 1759

Busch, H., Lane, M., Adams, H. R., DeBakey, M. E., and Muramatsu, M. Isolation of nucleoli from human tumors, 225

——. *See* Okamura and Busch, 693

Calabresi, P. *See* Lefkowitz, Creasey, Calabresi, and Sartorelli, 1207

——. *See* Papac, Calabresi, Hollingsworth, and Welch, 1459

Cali, A. *See* Ioachim, Cali, and Sinha, 132

Canning, L. *See* Griffin, Canning, Holland, and Malick, 318

Cantero, A. *See* Watters and Cantero, 67

Carbone, P. P. *See* DeVita, Carbone, Owens, Gold, Krant, and Edmonson, 1876

——. *See* Hersh, Carbone, Wong, and Freireich, 997

Cattan, A. *See* Mathé, Amiel, Schwarzenberg, Cattan, and Schneider, 1525

Chaikoff, I. L. *See* Abraham and Chaikoff, 647

——. *See* Griesbach, Chaikoff, Nichols, and Goldberg, 1804

Chang, J. P. *See* Ichinoe, Chang, and Sumrall, 552

SUBJECT INDEX

A-8103. *See* N,N'-bis(3-bromopropionyl) piperazine.

Abdominal wall, an electron microscopic study of the invasion of ascites tumor cells into, 490

Abnormalities, pathologic, incidence in laboratory stock of Xenopus, 3

Absorption,
- tritiated methotrexate,
  - in dogs, 1008
  - in man, 1018
  - in mice, 1008
  - in monkeys, 1008
  - in rats, 1008
- under carcinogenic conditions,
  - ^{14}C-labeled 3-hydroxyanthranilic acid from mouse urinary bladder, 1432
  - ^{14}C-labeled 3-hydroxy-L-kynurenine from mouse urinary bladder, 1432

2-Acetamidofluorene,
- latent ribonuclease in rat liver during feeding of, 1913
- ribonuclease inhibitor in rat liver during feeding of, 1913

2-Acetylaminofluorene,
- binding to rat liver ribonucleic acid *in vivo* of, 1262
- dietary, effect on the uracil-degrading enzymes in rat liver of, 703
- *N*-hydroxy derivatives of, enzymatic reduction by tissue preparations, 1743

Acid. *See* specific acid.

Acinar cells,
- liver, effect of azaserine on the fine structure of, 708
- pancreatic, effect of azaserine on the fine structure of, 708

Actinomycin D,
- effect on estrogen-induced changes in enzymes and nucleic acids of R3230AC mammary tumors, uteri, and mammary glands of, 1854
- effects on nucleic acid in intact and regenerating liver of rats, 307
- effects on protein metabolism in intact and regenerating liver of rats, 307
- enhanced response of Ridgway osteogenic sarcoma to roentgen radiation combined with, 1002
- use in determination of blood and urine levels, 241

Action, mechanism of, 6-mercaptopurine, 539, 544

Activities, carcinogenic, of *N*-hydroxy-2-acetylaminofluorene and its metal chelates as a function of retention time at the injection site, 527

Activity,
- carcinostatic,
  - of α-(*N*)- heterocyclic carboxaldehyde thiosemicarbazones, 1454
  - of isoquinoline-1-carboxaldehyde thiosemicarbazones, 1454
- catalase, studies on estimation by the use of titanium sulfate of, 534
- of adrenal nicotinamide adenine dinucleotide phosphate diaphorase in rats, chemical and histochemical study of the effect of transplanted tumor on, 552
- synergistic anti-neoplastic, of combinations of mitomycins with either 6-thioguanine or 5-fluorouracil, 1393

Adenocarcinoma,
- Barrett mammary,
  - fatty acid synthesis in, 647
  - glucose utilization in, 647
  - glutamine synthesis in, 647
  - metabolism of, 647
  - terminal oxidative patterns in, 647
- renal, promoted by crowded conditions in laboratory frogs, 1910

Adenomas, pulmonary, chemically-induced in mice, 20

Adenomata,
- formation in hypophyses of rats subjected to both subtotal thyroidectomy and administration of ^{131}I, 1804
- prevention by feeding of desiccated thyroid, 1804

Adenosine triphosphate phosphotransferases, during hepatocarcinogenesis, 193

Adenylic acid, deaminase activity in rat liver, effect of thioacetamide on, 596

Adrenal nicotinamide adenine dinucleotide phosphate diaphorase, activity in rats of, chemical and histochemical study of effect of transplanted tumor on, 552

Age,
- effect on transplantability in rats of virus-induced thymic lymphoma cultured *in vitro*, 132
- mice, incidence of cancer in quantitatively transplanted mammary glands and its relation to, 1792

Agents,
- alkylating, effects *in vitro* and *in vivo* upon the thermal properties of deoxyribonucleic acids from sensitive and resistant plasmacytomas of, 410
- bibliography of, supplement 1955–1959, Part 2, 639

Aggregation, directional movement of cells as affected by, 870

Albino, rats, tris(*p*-aminophenyl)carbonium pamoate and tumor induction in, 1919

Amethopterin,
- effects on sublines, association of specific chromosome with dihydrofolate reductase activity, 246
- influence on catalase activity, 270
- mutagenic action, 246
- use in determination of blood and urine levels, 241

Amines,
- carcinogenic,
  - dependence on vitamin E, 124
  - effects on amino acid incorporation by liver systems, 124
  - inhibition by aminofluorene treatment, 124

Amino acid,
- dependence on vitamin E of incorporation of, 124
- distribution in mouse pituitary thyrotropic tumors under influence of thyroxine, 265
- effects of carcinogenic amines on incorporation by liver systems of, 124
- inhibition by aminofluorene treatment of incorporation of, 124
- liver, further studies on incorporation into, 318
- tumor, further studies on incorporation into, 318

Aminofluorene treatment,
- effects on amino acid incorporation by liver systems, 124
- inhibition of carcinogenic amines, 124

Analogs,
- phosphoric, prevention of the terephthalanilide inhibition of leukemia P815Y *in vitro* by, 469
- purine nucleoside, metabolism, 46
- sulfonic, prevention of the terephthalanilide inhibition of leukemia P815Y *in vitro* by, 469

Analysis, fatty acid, two experimental transmissible glial tumors by gas-liquid chromatography, 201

Androgen,
- induction of leiomyosarcoma in ductus deferens of Syrian hamster,
  - *in vitro* characteristics, 147
  - *in vivo* characteristics, 141

Animal cells, deoxythymidylate synthetase and deoxythymidine kinase activities of virus-infected, 737

Animals,
- pyridoxine-deficient, antitumor effects of methylglyoxal-bis(*N*^{1}-methylthiosemicarbazone) and their potentiation in, 794
- tumor-bearing, liver catalase depression, mechanism, 34
- tumors of, effect of peptides of L-sarcolysin on, Part 2, 494

Antagonists, serotonin, influence on nitrogen mustard of, 382

Antibiotic, NSC-51954, metabolic effects on susceptible and resistant tumor cells of, 477

Antibodies, against the dense sediment and microsome fractions of *N*-2-fluorenylacetamide-induced rat hepatoma, differences between, 968

Antibody response, in mice inoculated neonatally with the Moloney virus, 851

Antigen,
- G (Gross) leukemia, 813
- leukocyte, in patients with malignant neoplasia, 725

Anti-metabolites, inhibition of primary immune response in man by, 997

Antitumor, selective effects of 4-deoxy-

pyridoxine and dietary pyridoxine deficiency, 153

Antitumor agents, blood and urine levels determined by cell culture methods, 241

9-β-D-Arabinofuranosyladenine, effect on *Vicia faba* chromosomes, 1764

1-β-D-Arabinofuranosylcytosine,
action on the nucleic acid metabolism and viability of HeLa cells of, 698
metabolism in L cells of, 1446

1-β-D-Arabinofuranosylcytosine hydrochloride, effects on regenerating bone marrow of, 1459

Ascites,
cell-free Sarcoma 37 tumor preparation,
glycolysis, 820
respiration, 820
Ehrlich carcinoma cells,
incorporation of glucosamine-1-^{14}C into macromolecules by, 1438
production of extracellular radioactive macromolecules during incubation with glucosamine-^{14}C by, 1860
Ehrlich tumor,
deoxycytidylic acid deaminase in, 922
metabolism of phospholipids in, 1463

Ascites tumor cells, invasion into abdominal wall of, an electron microscopic study of, 490

Ascites tumors,
development of, usefulness of tissue culture cell lines in, 444
Ehrlich cell nuclei,
bifunctional cross-linking reagents in, 1035
fine structure of protein in, 1035
from a transplantable squamous cell mouse carcinoma, usefulness of tissue culture cell lines in the development of, 444

Autografts, skin, in patients with lymphoma mycosis fungoides, 1844

8-Azaguanine, studies of deoxy- and ribonucleic acids and protein synthesis in cultured human cells, 185

Azaserine, effect on the fine structure of the liver and pancreatic acinar cells of, 708

Azo dye carcinogenesis. *See* Carcinogenesis, azo dye.

B10.D2 mice, resistant, electron microscopic studies of mouse ascites tumors in, 329

Bacteria, contamination, influence on liver catalase, 34

Barrett mammary adenocarcinoma. *See* Adenocarcinoma, Barrett mammary.

Basement membranes, synthesis by epithelial tumors of the mouse, 656

Behavior, electrophoretic, of EL4 lymphoma cells, influence of H-2 isoantibody on, 1753

3,4-Benzpyrene, initiator of skin tumor, 4-nitroquinoline *N*-oxide as inhibitor of, 933

Birth, growth and function of thiouracil-induced thyroid tumors transplanted into non-inbred rats thymectomized at, 423

1,3-Bis(3-chloroethyl)-1-nitrosourea,
effects upon the synthesis of protein and nucleic acids *in vivo* and *in vitro*, 1770
NSC-409962, clinical trials with, 1876

Biosynthesis,
of glycoproteins, 1438
production of extracellular radioactive macromolecules by Ehrlich ascites carcinoma cells during incubation with glucosamine-^{14}C, 1860

Bladder,
urinary, papilloma-like virus from tumors of bovine, 840
urinary tumors, histopathology, 12

Blood, determination of catalase activity, 270

Blood levels, determination in antitumor agents with cell culture methods, 241

Bone marrow,
effect of L-phenylalanine mustard on incorporation of radioactivity, 259
regenerating, effects of 1-β-D-arabinofuranosylcytosine hydrochloride on, 1459

Bovine, urinary bladder tumors, papilloma-like virus from, 840

Brain,
effect of L-phenylalanine mustard on incorporation of radioactivity, 259
human, localization of radioantibodies in tumors of, 773
tumors, localization by radioautography of radioantibodies in human, 779

Breast,
benign disease of, excretion patterns of urinary metabolites of estradiol-4-^{14}C in postmenopausal women with, 371
malignant disease of, excretion patterns of urinary metabolites of estradiol-4-^{14}C in postmenopausal women with, 371
masses, serum protein-bound fucose in patients with, 1779

Brown fat, mouse, lipid composition of hibernoma as compared with that of lipoma and of, 408

C1498 ascites tumor cells, electron microscopic studies of in susceptible and resistant mice, 329

C3H/HeJ mice, occurrence of biologic crystals in tumor and nontumor cultures, 214

C57BL mice, susceptible, electron microscopic studies of mouse ascites tumors in, 329

Cancer,
circulating cells, organ localization and the effects of trauma on the fate of, 1728
etiology, symposium on epidemiologic approaches to, 1271
folic acid activity, 221
incidence in quantitatively transplanted mammary glands and its relation to age and milk agent of the donor and host mice, 1792

Cancerocidal agents, evaluation by induced transmissible sarcoma in hamsters, 107

Carbohydrate,
content in subcellular fractions of rat liver and of Walker 256 carcinosarcoma, 1225
metabolism, effects of several forms of transplantable rat leukemias on, 1823

Carcinogenesis,
azo dye,
nucleocytoplasmic ratios in different populations of rat liver parenchymal cells during, 1213
rat liver parenchymal cell function, 67
selective alteration of rapidly-labeled ribonucleic acid synthesis in rat liver during, 472
conditions of, absorption of ^{14}C-labeled 3-hydroxy-L-kynurenine and 3-hydroxyanthranilic acid from the mouse urinary bladder under, 1432
mouse, isolation of skin constituents, 161
of skin, contribution of elemental sulfur and of organic sulfur compounds, 1759
rat,
by 3-methoxy dyes, effect of dietary copper, 1784
multiple skin tumors by painting with 3-methoxy-4-dimethylaminoazobenzene, 1784
urethan, catabolism of urethan in young mice of varying age and strain and X-irradiated mice in relation to, 855

Carcinogens,
enzymatic reduction by tissue preparations of *N*-hydroxy derivatives of, 1743
sugars and, an experimental study, 440

Carcinoma,
Ehrlich ascites cells, incorporation of glucosamine-1-^{14}C into macromolecules by, 1438
Ehrlich-Lettré ascites, effects of Tween 80 on the *in vitro* and metabolism of cells of, 764
human epidermoid (H.Ep. #3), growing in cortisone-conditioned Swiss mice, Part 2, 457
human gastrointestinal, localization of sulfate-^{35}S in, 911
immunology, of spontaneous mammary in mice, 451
in mice, immunology of spontaneous mammary, 451
mammary, spontaneous, immunology of in mice, 451
mouse, usefulness of tissue culture cell lines in development of ascites tumors from transplantable squamous cell, 444
of mouse cervix,
electron microscopic study, 802
induced by methylcholanthrene, 802
squamous cell, usefulness of tissue culture cell lines in development of ascites tumors from a transplantable, 444

Carcinoma cells, Ehrlich ascites, production of extracellular radio-

active macromolecules during incubation with glucosamine-^{14}C by, 1860

Carcinosarcoma, Walker 256, carbohydrate content in subcellular fractions of, 1225

Catabolism, of urethan, in young mice of varying age and strain and in X-irradiated mice in relation to urethan carcinogenesis, 855

Catalase,
activity,
estimation by the use of titanium sulfate of, 534
in mouse leukemia L1210, 270
depression, liver, mechanism in animals, 34
synthesis, influence on liver catalase depression, 34

Cell culture,
effect of mitomycin-C on the nucleolar fine structure of KB cells in, 628
methods, determination of blood and urine levels of antitumor agents, 241
studies, with unique cytotoxic steroids, 417
suspension, derived from the Novikoff hepatoma, 499

Cell cycle, relationship to tumor growth and control of cell division of, 581

Cell division, control of, relationship of cell cycle to tumor growth and, 581

Cell function, rat liver parenchymal, during carcinogenesis, 67

Cell lines, tissue culture, usefulness of in development of ascites tumors from transplantable squamous cell mouse carcinoma, 444

Cells,
animal, deoxythymidylate synthetase and deoxythymidine kinase activities of virus-infected, 737
circulating cancer, organ localization and the effect of trauma on the fate of, 1728
directional movement of, as affected by aggregation and dispersal, 870
Ehrlich ascites carcinoma, incorporation of glucosamine-1-^{14}C into macromolecules by, 1438
Ehrlich ascites tumor, deoxycytidylic acid deaminase in, 922
Ehrlich-Lettré ascites carcinoma, effects of Tween 80 on the *in vitro* metabolism of, 764
human, studies of cultured, exposed to 8-azaguanine, 185
irradiated, effect of delayed addition to small viable tumor inocula of, 355
leukemic, acid-soluble nucleotides in, 575
mouse epidermal, carcinogenesis, isolation of skin constituents, 161
tumor. *See* Tumor cells.
tumorigenic,
application of methods for determining the response to biologically active compounds of, Part 2, 1609
methods for determining response to biologically active compounds of, Part 2, 1609
response to biologically active compounds of, Part 2, 1609

Cell strains, diploid, additive cytotoxicity of 5-fluorouracil and γ-radiation on, 760

Cervix,
mouse, electron microscopic study of methylcholanthrene-induced carcinoma of, 802
Syrian hamsters, inhibitory effect of vitamin A on tumors induced by carcinogenic polycyclic hydrocarbons in, 884

Chelates, metal, of *N*-hydroxy-2-acetylaminofluorene as function of retention at the injection site, 527

Chemical,
aspects of compensatory renal hypertrophy, 1882
screening data on 234, Part 2, 457

Chemotherapy,
activity, studies on relationship of phthalanilide-deoxyribonucleic acid complexes to, 902
cancer,
screening data, XXII, Part 2, 1
screening data, XXIII, Part 2, 207
screening data, XXIV, Part 2, 522
screening data, XXV, Part 2, 1077
screening data, XXVI, Part 2, 1253
screening data, XXVII, Part 2, 1433
screening data, XXVIII, Part 2, 1626
screening data, XXIX, Part 2, 1779
effects on mammalian tumor cells, biologic and chromosomal instability of cyclophosphamide-treated murine leukemia, 604

Chicken,
folic reductase, enzyme activity of embryonic organs of, 1894
with Sarcoma 13, serum lactate dehydrogenase of, 919

Cholangiocarcinoma, assay of glucose-adenosine triphosphate phosphotransferases, 193

Chromatography,
gas-liquid, fatty acid analysis of two experimental transmissible glial tumors, 201
studies of purine metabolism, inhibition of inosine phosphorylase by 6-mercaptopurine, 1925

Chromosome breaks,
in cultured normal human leukocytes, induction by hydroxyurea of, 980
induction by potassium arsenite of, 980

Chromosomes,
of *Vicia faba*, effect of 9-β-D-arabinofuranosyladenine on, 1764
small acrocentric, abnormal length in chronic lymphocytic leukemia of, 1904
specific, association with dihydrofolate reductase activity in amethopterin-treated sublines, 246
subtelocentric, association with dihydrofolate reductase, 246

Clinical effects,
of combinations of 6-thioguanine and duazomycin in patients with neoplastic disease, 1207
of prolonged intravenous infusion of 5-fluoro-2′-deoxyuridine, 1025

Colon, glycolytic enzymes in normal and malignant tissues, 206

Composition, base, of high molecular weight ribonucleic acid of Walker tumor and liver of the rat, 693

Connective tissue. *See* Tissue, connective.

Content, of carbohydrate, in subcellular fractions of rat liver and of Walker 256 carcinosarcoma, 1225

Control, of acute leukemia, symposium on conference on obstacles to, 1469

Copper,
dietary,
effect on rat carcinogenesis by 3-methoxy dyes, 1784
multiple skin tumors by painting with 3-methoxy-4-dimethylaminoazobenzene, 1784

Cortisone, Swiss mice conditioned with, study of human epidermoid carcinoma (H.Ep. #3) growing in, Part 2, 457

***Croton tiglium* L.,** tumor-enhancing principles, 1871

Crystals, biologic, occurrence in tumor and nontumor cultures of C3H/HeJ mice, 214

Cucurbitacins, effect of on transplanted tumors in mice when combined with x-ray treatment, 1828

Cultures,
nontumor, occurrence of biologic crystals in C3H/HeJ mice, 214
tumor, occurrence of biologic crystals in C3H/HeJ mice, 214

Cyclophosphamide,
biologic and chromosomal instability of a murine leukemia treated with, 604
use in determination of blood and urine levels, 241

Cysts, incidence in Xenopus, 3

Cytogenetics, mouse leukemia L1210, 246

Cytotoxicity, of 5-fluorouracil and γ-radiation on diploid cell strains, 760

Cytoxan, inhibition of hemagglutinin synthesis by, 745

DBAG tumor,
glycolysis, rate-limiting factors of inorganic phosphate in, 1733
inorganic phosphate, rate-limiting factors in glycolysis and transport of, 1733
transport, rate-limiting factors of inorganic phosphate in, 1733

DBAH$_1$ tumor,
glycolysis, rate-limiting factors of inorganic phosphate in, 1733
inorganic phosphate, rate-limiting factors in glycolysis and transport of, 1733
transport, rate-limiting factors of inorganic phosphate in, 1733

Deaminase, deoxycytidylic acid, in Ehrlich ascites tumor cells, 922

Deaminase activity, of adenylic acid in rat liver, effect of thioacetamide on, 596

Deficiency, pyridoxine, antitumor effects of methylglyoxal-bis(N^4-methyl-

thiosemicarbazone) and their potentiation in animals with, 794

Degradation, initial, of deoxyribonucleic acid after injection in mammals, 877

Dehydrogenase, serum lactate of chicken with Sarcoma 13, 919

Dense sediment, of *N*-2-fluorenylacetamide-induced rat hepatoma, differences between antibodies against microsome fraction and, 968

Deoxycytidylic acid, deaminase, in Ehrlich ascites tumor cells, 922

4-Deoxypyridoxine, effects, differences in selective antitumor, 153

Deoxyribonucleic acid,
- and phthalanilide complexes,
  - studies on formation of, 902
  - studies on relationship to chemotherapeutic activity of, 902
- from neoplastic human tissues,
  - priming activity in a deoxyribonucleic acid polymerase system of, 1238
  - some macromolecular properties of, 1244
- from normal human tissues,
  - priming activity in a deoxyribonucleic acid polymerase system of, 1238
  - some macromolecular properties of, 1244
- from plasmacytomas, effects of alkylating agents *in vitro* and *in vivo* upon the thermal properties of, 410
- initial degradation after injection in mammals of, 877
- polymerase system of, priming activity of deoxyribonucleic acid from normal and neoplastic human tissues in, 1238
- studies in cultured human cells exposed to 8-azaguanine, 185
- synthesis in regenerating liver of rats of, inhibition by hydroxyurea of, 1867
- thermal properties of,
  - effects of alkylating agents *in vitro* and *in vivo* on, 410
  - studies with mustard, 410

Deoxythymidine, kinase activity, of virus-infected animal cells, 737

Deoxythymidylate, synthetase activity, of virus-infected animal cells, 737

Diet,
- effects of pyridoxine deficiency, 153
- effects on fatty acid composition of microsomal phospholipids, 118

Diffusion chamber, studies of allogenic tumor immunity in mice, 1888

Dihydrofolate reductase, association with subtelocentric chromosome, 246

Dihydrofolate reductase activity, association of specific chromosome in amethopterin-treated sublines, 246

1,4-Dimethanesulfonoxybutane, somatic effects on mice, 20

4-Dimethylaminoazobenzene,
- effects on hepatic microsomal phospholipids, 118
- influence on rose bengal chromoexcretion, 67

4-(*p*-Dimethylaminostyryl)quinoline, oncogenic effects in mice of, 938

Dimethyl myleran. *See* Myleran, dimethyl.

Diploid cell strains, additive cytotoxicity of 5-fluorouracil and γ-radiation on, 760

Diseases,
- malignant hematologic,
  - serum folate in patients with, 1933
  - serum vitamin B_{12} in, patients with 1933
- neoplastic, clinical and pharmacologic effects of combinations of 6-thioguanine and duazomycin A in patients with, 1207

Disorders,
- myeloproliferative, phagocytic capabilities of leukocytes from, 1199
- neoplastic, phagocytic capabilities of leukocytes from, 1199

Dispersal, directional movement of cells as affected by, 870

Disposition, physiologic, of a phthalanilide (NSC-38280) and a phthalamidine derivative (NSC-57155) in 7 patients, clinical investigation of, 402

Distribution,
- of polyribosomes, in minimal deviation hepatomas, 1219
- of tritiated methotrexate,
  - in dogs, 1008
  - in mice, 1008
  - in monkeys, 1008
  - in rats, 1008

Division cycle, progress of L cells through, effects of vinblastine on, 1232

Dogs,
- absorption of tritiated methotrexate in, 1008
- distribution of tritiated methotrexate in, 1008
- excretion of tritiated methotrexate in, 1008

Doubling time,
- of intraperitoneal Ehrlich ascites tumor, 685
- of subcutaneous Ehrlich ascites tumor, 685

Duazomycin A,
- combined with 6-thioguanine in patients with neoplastic disease,
  - clinical effects of, 1207
  - pharmacologic effects of, 1207

Ductus deferens,
- *in vitro* characteristics of induced, dependent leiomyosarcoma in Syrian hamster, 147
- *in vivo* characteristics of induced, dependent leiomyosarcoma in Syrian hamster, 141

Dyes,
- 3-methoxy,
  - effect of dietary copper on rat carcinogenesis by, 1784
  - multiple skin tumors by painting with, 1784

Effects,
- biochemical, mechanism of action of 6-mercaptopurine, 539
- metabolic, of an antibiotic, NSC-51954, on susceptible and resistant tumor cells, 477

Ehrlich ascites,
- carcinoma cells,
  - incorporation of glucosamine-1-^{14}C into macromolecules by, 1438
  - production of extracellular radioactive macromolecules during incubation with glucosamine-^{14}C by, 1860
- tumor,
  - deoxycytidylic acid deaminase in, 922
  - intraperitoneal, doubling time of, 685
  - intraperitoneal, mitotic rate of, 685
  - metabolism of phospholipids in, 1463

Ehrlich-Lettré ascites carcinoma, effects of Tween 80 on the *in vitro* metabolism of cells of, 764

E.L.4 ascites tumor cells, electron microscopic studies of in susceptible and resistant mice, 329

EL4 lymphoma cells, influence of H-2 isoantibody on electrophoretic behavior of, 1753

Electron microscope,
- study of invasion of ascites tumor cells into the abdominal wall, 490
- study of methylcholanthrene-induced carcinoma of mouse cervix by, 802

Emboli, tumor cell, comparison in veins and lymphatics of metastatic growth produced by, 324

Embryonic organs,
- of chicken, enzyme activity of, 1894
- of human, enzyme activity of, 1894
- of rat, enzyme activity of, 1894

Endoreduplication, induced *in vivo* and *in vitro* in human leukocytes with N,N'-bis-(3-bromopropionyl) piperazine (A-8103), 275

Energy,
- glycolytic, rate-limiting factor in transport of inorganic phosphate in $DBAH_1$ tumor, DBAG tumor, Novikoff hepatoma, and Novikoff ascites tumor, 1733
- respiratory, rate-limiting in transport of inorganic phosphate in $DBAH_1$ tumor, DBAG tumor, Novikoff hepatoma, and Novikoff ascites tumor, 1733

Enzyme,
- activity of embryonic organs of chicken, rat, and human, 1894
- glycolytic,
  - normal and malignant tissues of colon and rectum, 206
  - patterns in rat liver and hepatoma of, 671
- increase in a new lactating mammary tumor line in rat, 286
- level of activity of, in transplantable mouse tumors, 1899
- mammary glands, effect of actinomycin D on estrogen-induced changes in, 1854

mammary tumors, effect of actinomycin D on estrogen-induced changes in, 1854
patterns, human tissues, glycolytic, normal and malignant tissues of colon and rectum, 206
related to glutamine metabolism in tumor-bearing rats, 677
uracil-degrading, effect of dietary 2-acetylaminofluorene on, 703
uteri, effect of actinomycin D on estrogen-induced changes in, 1854
Epidemiology, approaches to cancer etiology of, symposium on, 1271
Epidermoid, human carcinoma (H.Ep. #3), growing in cortisone-conditioned Swiss mice, Part 2, 457
Erythrocytes, nucleated, effect of mustard gases upon a property of, 752
Estradiol-4-^{14}C, excretion patterns of urinary metabolites of in postmenopausal women with benign and malignant disease of the breast, 371
Estrogen,
effect of actinomycin D on, changes in enzymes and nucleic acids of R3230AC mammary tumors, uteri, and mammary glands induced by, 1854
induction of leiomyosarcoma in ductus deferens of Syrian hamster,
in vitro characteristics, 147
in vivo characteristics, 141
kidney tumors in golden hamster induced by, luteinizing hormone levels in pituitary gland during tumorigenesis, 1781
Ethyl carbamate. *See* Urethan.
Etiology, of cancer, symposium on epidemiologic approaches to, 1271
Excretion,
of tritiated methotrexate,
in dogs, 1008
in man, 1018
in mice, 1008
in monkeys, 1008
in rats, 1008
patterns of urinary metabolites of estradiol-4-^{14}C in postmenopausal women with benign and malignant disease of the breast, 371
Exploration, preliminary, localization of radioantibodies in human brain tumors, 773

Fatty acid,
composition of microsomal phospholipids, dietary effects, 118
distribution, effect of location of tumor, 201
oxidation, in transplantable liver tumors, 732
pattern, characteristic of triglycerides of tumor, 201
synthesis in Barrett mammary adenocarcinoma, 647
Feeding,
of 2-acetamidofluorene,
latent ribonuclease in rat liver during, 1913
ribonuclease inhibitor in rat liver during, 1913
Fine structure,
of liver acinar cells, effect of azaserine on, 708
of pancreatic acinar cells, effect of azaserine on, 708
of protein, in Ehrlich ascites tumor cell nuclei, 1035
***N*-2-Fluorenylacetamide,**
rat hepatoma induced by,
differences between antibodies against the dense sediment and microsome fractions of, 968
purification of localizing antibodies formed against microsomes of, 962
5-Fluoro-2′-deoxyuridine, clinical effects of prolonged intravenous infusion of, 1025
5-Fluorodeoxyuridine, use in determination of blood and urine levels, 241
Fluoropyrimidines, effect on delayed cutaneous hypersensitivity of, 977
5-Fluorouracil,
additive cytotoxicity on diploid cell strains of, 760
combined with mitomycins, synergistic anti-neoplastic activity of, 1393
use in determination of blood and urine levels, 241
Folate, serum, in patients with malignant hematologic diseases, 1933
Folic acid, activity in leukemia and cancer, 221
Folic reductase,
studies on,
enzyme activity of embryonic organs of chicken, rat, and human, 1894
the levels of enzyme activity and response to methotrexate of transplantable mouse tumors, 1899
Forestomach, Syrian hamster, inhibitory effect of vitamin A on tumors induced by carcinogenic polycyclic hydrocarbons in, 884
Foundations of cancer research in 19th century, advances in pathology, nomenclature, and theories of oncogenesis, 75
Frogs, renal adenocarcinomas in, promoted by crowded laboratory conditions, 1910

host-parasite,
phagocytic capabilities of leukocytes from myeloproliferative and other neoplastic disorders, 1199
role of phagocyte in, 1199

Interstitial fluid,
chemical pathology of, 458
proteolytic activities in transplanted mouse tumors, 458

Intestine, effect of L-phenylalanine mustard on incorporation of radioactivity, 259

Intoxication, nitrogen mustard, influence of serotonin antagonists on, 382

Intracellular glucose, availability of, rate-limiting factor for glycolysis of inorganic phosphate in DBAH$_1$ tumor, DBAG tumor, and Novikoff hepatoma, 1733

Intrasplenic route, leukemia of short latency in mice injected with human malignant tissue by, 565

Intravenous, infusion of 5-fluoro-2'-deoxyuridine, clinical effects of prolonged, 1025

Investigation, clinical, of the physiologic disposition of a phthalanilide (NSC-38280) and a phthalamidine derivative (NSC-57155) in 7 patients, 402

5-Iodo-2'-deoxyuridine, uptake of ^{125}I-label into tissues of mice bearing hepatoma-129, 234

Irradiation, cells, effect of delayed addition to small viable tumor inocula of, 355

Ischemia, complete, substrates of glycollysis in intracranial tumors during, 432

Isonicotinic acid hydrazide, selective antitumor effects in combination with 4-deoxypyridoxine, 153

Isoquinoline-1-carboxaldehyde thiosemicarbazone, carcinostatic activity of, 1454

KB cells, in cell culture, effect of mitomycin-C on the nucleolar fine structure of, 628

KB sublines, observations on, 1254

Kethoxal bis(thiosemicarbazone),
effects against experimental tumors of, 1410
pathologic effects of, 1417
toxic effects of, 1417

Ketogenesis, in transplantable liver tumors, 732

Kidney,
determination of catalase activity, 270
effect of L-phenylalanine mustard on incorporation of radioactivity, 259
golden hamster,
estrogen-induced tumors in, 1781
luteinizing hormone levels in the pituitary gland during tumorigenesis, 1781
influence of thyroxine on distribution of radioactivity, 265
lymphosarcomas, effect, 3

Kinase activity, deoxythymidine, of virus infected animal cells, 737

Laboratory, crowded conditions of, renal adenocarcinomas in frogs promoted by, 1910

Lactate dehydrogenase, serum, of chickens with Sarcoma 13, 919

***Lactobacillus casei*,** measurement of folic acid activity in leukemia and cancer, 221

L cells,
metabolism of 1-β-D-arabinofuranosylcytosine in, 1446
progress through the division cycle, effects of vinblastine on, 1232
proliferative capacity of, effects of vinblastine on, 1232

Leiomyosarcoma,
hormone-dependent, of ductus deferens/epididymal tail, 141, 147
induced in ductus deferens of Syrian hamster, *in vitro* characteristics, 147
in vivo characteristics, induced in ductus deferens of Syrian hamster, 141

Length, abnormal, of small acrocentric chromosomes in chronic lymphocytic leukemia, 1904

Lens opacities, premature development in mice, 20

Leukemia,
acute, symposium on conference on obstacles to control of, 1496
chronic lymphocytic, abnormal length of small acrocentric chromosomes in, 1904
development, in mice inoculated neonatally with the Moloney virus, 851
folic acid activity, 221
G (Gross) antigen, 813
L1210,
cytogenetics of mouse, 246
mouse catalase activity, 270
monocytic, effects of on the carbohydrate metabolism of the host, 1823
murine,
biologic and chromosomal instability of a cyclophosphamide-treated, 604
cell lines of different radiosensitivity *in vitro*, effects of dimethyl myleran on, 1401
cell lines of different radiosensitivity *in vitro*, effects of nitrogen mustard on, 1401
myelogenous, effects of on the carbohydrate metabolism of the host, 1823
myeloid, x-ray-induced in mice, 20
of short latency, in mice injected with human malignant tissue by intrasplenic route, 565
P815Y, prevention by sulfonic and phosphoric analogs of the terephthalanilide inhibition of, 469
rat, effects of on carbohydrate metabolism of the host, 1823

Leukemic cells, acid-soluble nucleotides in, 575

Leukemic lymphoblasts, originating from thymic lymphoma, 132

Leukocyte,
antigens, in patients with malignant neoplasia, 725
cultured normal human,
induction of chromosome breaks by hydroxyurea and related compounds in, 980
induction of chromosome breaks by potassium arsenite in, 980
from myeloproliferative disorders, phagocytic capabilities of, 1199
from neoplastic disorders, phagocytic capabilities of, 1199
human,
endoreduplication induced *in vivo* and *in vitro* with *N,N'*-bis-(3-bromopropionyl) piperazine (A-8103), 275
polypoidy induced *in vivo* and *in vitro* with *N,N'*-bis-(3-bromopropionyl) piperazine (A-8103), 275

Lipid,
composition of, in hibernoma as compared with that of lipoma and of mouse brown fat, 408
hepatic, in tumor-bearing (glioma) mice, 957

Lipoma, lipid composition of, as compared with that of hibernoma and of mouse brown fat, 408

Liver,
acinar cells, effect of azaserine on fine structure of, 708
actinomycin D effects on nucleic acid and protein metabolism in intact and regenerating, of rats, 307

amino acid incorporating systems, further studies on, 318
catalase depression, mechanism in animals, 34
catalase, inhibition *in vitro*, 34
deoxyribonucleic acid, cold acid-soluble, and protein fractions, comparison of radioactivity distribution, 234
determination of catalase activity, 270
effect of L-phenylalanine mustard on incorporation of radioactivity, 259
influence of thyroxine on distribution of radioactivity, 265
lymphosarcomas, effect, 3
of rat,
base composition of high molecular weight nuclear ribonucleic acid of, 693
latent ribonuclease during feeding of 2-acetamidofluorene in, 1913
ribonuclease inhibitor during feeding of 2-acetamidofluorene in, 1913
parenchymal cell function during carcinogenesis in rat, 67
parenchymal cells of rat, neucleocytoplasmic ratios during azo dye carcinogenesis in different populations of, 1213
rat,
binding of 2-acetylaminofluorene to ribonucleic acid *in vivo* to, 1262
biochemical and autoradiographic study of the *in vivo* utilization of tritiated thymidine in regenerating, 1817
carbohydrate content in subcellular fractions of, 1225
effect of dietary 2-acetylaminofluorene on the uracil-degrading enzymes in, 703
effect of thioacetamide on adenylic acid deaminase activity and nuclear ribonucleic acid metabolism in, 596
patterns of glycolytic enzymes in, 671
selective alteration of rapidly-labeled ribonucleic acid synthesis during azo dye carcinogenesis, 472
regenerated, assay of glucose-adenosine triphosphate phosphotransferases, 193
regenerating of rats, inhibition of deoxyribonucleic acid synthesis by hydroxyurea in, 1867
systems,
dependence on vitamin E, 124
effects of carcinogenic amines on amino acid incorporation, 124
inhibition by aminofluorene treatment, 124
tissue, metabolic profiles during carcinogenesis and related conditions in, 833
transplantable tumors,
fatty acid oxidation in, 732
ketogenesis in, 732

Localization,
of radioantibodies in human brain tumors,
preliminary exploration, 773
radioautography, 779
of sulfate-^{35}S, in human gastrointestinal carcinomas, 911

Localizing antibodies, formed against microsomes of *N*-2-fluorenylacetamide-induced rat hepatoma, purification of, 962

Lymphatics, comparison with veins of metastatic growth produced by tumor cell emboli in, 324

Lymphoma,
mycosis fungoides,
skin autografts in patients with, 1844
skin homografts in patients with, 1844
thymic,
chemically-induced in mice, 20
virus-induced, age-dependent transplantability in rats, 132
virus-induced, cultured *in vitro*, 132

Lymphosarcomas,
in Xenopus, 7
spontaneous, incidence in laboratory stock of Xenopus, 3

Macromolecular properties, of deoxyribonucleic acid from normal and neoplastic human tissue, 1244

Macromolecules,
extracellular radioactive, production by Ehrlich ascites carcinoma cells during incubation with glucosamine-^{14}C of, 1860
incorporation of glucosamine-1-^{14}C by Ehrlich ascites carcinoma cells into, 1438

Mammals, initial degradation of deoxyribonucleic acid after injection in, 877

Mammary glands. *See* Glands, mammary.

Mammary tumor line, biochemical and morphologic properties of a new lactating, in rat, 286

Mammary tumors, R3230AC, effect of actinomycin D on estrogen-induced changes in enzymes and nucleic acids of, 1854

Man,
absorption, of tritiated methotrexate in, 1018
excretion, of tritiated methotrexate in, 1018
primary immune response by antimetabolites in, inhibition of, 997

Marrow, bone. *See* Bone marrow.

Masses, breast, serum protein-bound fucose in patients with, 1779

2-Mercaptoethylguanidine hydrobromide, selective protection of the gastrointestinal tract against radiation injury by perfusion with, 609

6-Mercaptopurine,
inhibition of inosine phosphorylase by, 1925
mechanism of action of,
basis for specificity, 544
biochemical effects, 539
use in determination of blood and urine levels, 241

Metabolism,
carbohydrate, effects of several forms of transplantable rat leukemias on, 1823
carcinogenesis in hepatic tissue, and related conditions, 833
profiles during, 833
glutamine, enzymes related to in tumor-bearing rats, 677
in vitro of cells of the Ehrlich-Lettré ascites carcinoma, effects of Tween 80 on, 764
in vivo,
of fluorinated pyrimidines, 377
of 5-trifluoromethyl-2′-deoxyuridine-2-^{14}C, 377
of 5-trifluoromethyluracil-2-^{14}C, 377
iron, alteration in, influence on liver catalase in animals, 34
of 1-β-D-arabinofuranosylcytosine, in L cells, 1446
of Barrett mammary adenocarcinoma, 647
of HeLa cells, action of 1-β-D-arabinofuranosylcytosine on, 698
of nuclear ribonucleic acid in rat liver, effect of thioacetamide on, 596
of phospholipids, in Ehrlich ascites tumor, 1463
of tritiated methotrexate in man, 1018
protein, in intact and regenerating liver of rats, effects of actinomycin D on, 307
purine nucleoside analogs, 46
pyrimidine, in tissue culture cells derived from rat hepatomas, 499, 509, 517
pyrimidine nucleosides, relationship of thymidine to, 517
tritiated methotrexate, fate of, 1008

Metabolites, urinary, excretion patterns of estradiol-4-^{14}C in postmenopausal women with benign and malignant disease of the breast, 371

Metal chelates, of *N*-hydroxy-2-acetylaminofluorene, carcinogenic activities of as a function on retention at the injection site, 527

Metamorphosis, influence of lymphosarcoma in Xenopus, 7

Metaplasia,
glandular, occurrence with papilloma-induced fibromas, 12
squamous, occurrence with papilloma-induced fibromas, 12

Metastases,
hepatic,
effect of neonatal thymectomy, 993
experimental studies of factors influencing, 993
lung, protein profiles of, 896

Methotrexate. *See* also Amethopterin.
response to, of transplantable mouse tumors, 1899
tritiated,
absorption in dogs, 1008
absorption in man, 1018
absorption in mice, 1008
absorption in monkeys, 1008
absorption in rats, 1008
distribution in dogs, 1008
distribution in mice, 1008
distribution in monkeys, 1008
distribution in rats, 1008
excretion in dogs, 1008
excretion in man, 1018
excretion in mice, 1008
excretion in monkeys, 1008

excretion in rats, 1008
metabolic fate in man of, 1018
metabolic fate of, 1008

3-Methoxy-4-dimethylaminoazobenzene,
effect of dietary copper on rat carcinogenesis by, 1784
multiple skin tumors by painting with, 1784

Methylcholanthrene, carcinoma of the mouse cervix induced by, an electron microscopic study of, 802

20-Methylcholanthrene, induction of transmissible sarcoma in hamsters, 107

3′-Methyl-dimethylaminoazobenzene, effects on glucose-adenosine triphosphate phosphotransferases during hepatocarcinogenesis, 193

2-Methyl-4-dimethylaminoazobenzene, influence on rose bengal chromoexcretion, 67

Methylglyoxal-bis(*N*^{1}-methylthiosemicarbazone),
antitumor effects in pyridoxine-deficient animals of, 794
potentiation in pyridoxine-deficient animals of effects of, 794

Mice,
absorption of tritiated methotrexate in, 1008
allogenic tumor immunity in, diffusion chamber studies of, 1888
C3H/HeJ, occurrence of biologic crystals in tumor and nontumor cultures, 214
carcinomas, spontaneous mammary, immunology of, 451
combined effect of cucurbitacins and x-ray treatment on transplanted tumors in, 1828
comparative uptake of ^{125}I-labeled 5-iodo-2′-deoxyuridine and thymidine-^{3}H into tissues bearing hepatoma-129, 234
4-(*p*-dimethylaminostyryl)quinoline, oncogenic effects of in, 938
distribution of tritiated methotrexate in, 1008
donor, incidence of cancer in quantitatively transplanted mammary glands and its relation to age and milk agent of, 1792
excretion of tritiated methotrexate in, 1008
glioma-bearing, hepatic lipids in, 957
host, incidence of cancer in quantitatively transplanted mammary glands and its relation to age and milk agent of, 1792
injected with human malignant tissue by intrasplenic route, leukemia of short latency in, 565
injection of labeled proteins, uptake by particulate fractions of tumor and normal tissues after, 865
immunology, of spontaneous mammary carcinomas in, 451
inoculated neonatally with Moloney virus,
antibody response in, 851
leukemia development in, 851
Swiss, study of human epidermoid carcinoma (H.Ep. #3) growing in cortisone-conditioned, Part 2, 457
tumor, resistance to a rapidly and slowly developing, 451
tumor-bearing, hepatic lipids in, 957
varying age, catabolism of urethan in relation to urethan carcinogenesis in, 855
varying strain, catabolism of urethan in relation to urethan carcinogenesis in, 855
X-irradiated, catabolism of urethan in relation to urethan carcinogenesis in, 855

Microscope, electron, *See* Electron microscope.

Microsome fractions, of the *N*-2-fluorenylacetamide-induced rat hepatoma, differences between dense sediment and, 968

Microsomes, *N*-2-fluorenylacetamide-induced rat hepatoma, purification of localizing antibodies formed against, 962

Milk agent, mice, incidence of cancer in quantitatively transplanted mammary glands and its relation to, 1792

Mitomycin-C, effect on the nucleolar fine structure of KB cells in cell culture of, 628

Mitomycins,
combined with 5-fluorouracil, synergistic anti-neoplastic activity of, 1393
combined with 6-thioguanine, synergistic anti-neoplastic activity of, 1393

Mitotic rate,
of intraperitoneal Ehrlich ascites tumor, 685
of subcutaneous Ehrlich ascites tumor, 685

Moloney virus,
antibody response in mice inoculated neonatally with, 851
leukemia development in mice inoculated neonatally with, 851

Monkeys,
absorption of tritiated methotrexate in, 1008
distribution of tritiated methotrexate in, 1008
excretion of tritiated methotrexate in, 1008

Mouse,
ascites tumors of, electron microscopic studies of in susceptible and resistant, 329
brown fat, lipid composition of, as compared with that of lipoma and hibernoma, 408
carcinoma, usefulness of tissue culture cell lines in the development of ascites tumors from a transplantable squamous cell, 444
catalase activity in leukemia L1210, 270
cervix, an electron microscopic study of methylcholanthrene-induced carcinoma of, 802
epidermal cells and carcinogenesis, isolation of skin constituents, 161
epithelial tumors of, synthesis of basement membranes by, 656
ileocecal junction ulceration, relation to development of reticulendothelial tumors in, 53
pituitary thyrotropic tumors, distribution of amino acids under the influence of thyroxine, 265
somatic effects of chemical and x-rays, 20
squamous cell carcinoma, usefulness of tissue culture cell lines in the development of ascites tumors from a transplantable, 444
transplantable tumors of,
level of enzyme activity of, 1899
response to methotrexate of, 1899
tumors, transplanted,
chemical pathology of interstitial fluid in, 458
proteolytic activities in, 458
urinary bladder, absorption under carcinogenic condition of ^{14}C-labeled 3-hydroxy-L-kynurenine and 3-hydroxyanthranilic acid from, 1432

Movement of cells, directional, as affected by aggregation and dispersal, 870

Murine,
leukemia cell lines of different radiosensitivity *in vitro*,
effects of dimethyl myleran on, 1401
effects of nitrogen mustard on, 1401

Murine leukemia, biologic and chromosomal instability of cyclophosphamide-treated, 604

Muscle,
effect of L-phenylalanine mustard on incorporation of radioactivity, 259
influence of thyroxine on distribution of radioactivity, 265

Mustard gases, effect upon a property of nucleated erythrocytes and their ghosts of, 752

Mustards, studies with, effects of alkylating agents *in vitro* and *in vivo* upon the thermal properties of deoxyribonucleic acids from sensitive and resistant plasmacytomas, 410

Myleran. *See* also 1,4-dimethanesulfonoxybutane.
dimethyl, effects on murine leukemia cell lines of different radiosensitivity *in vitro* of, 1401

Mycosis fungoides,
lymphoma,
skin autografts in patients with, 1844
skin homografts in patients with, 1844

Neonatal,
inoculation with Moloney virus,
antibody response in mice, 851
leukemia development in mice, 851
thymectomy,
effect of, 993
influence on hepatic metastases, 993

Neoplasia,
biochemical parameters of, 1238, 1244
malignant, individual specific leukocyte antigens in patients with, 725

Neoplasms, development from microscopic ulcers, 53

Neoplastic diseases, human, progress in research, 75

Neoplastic properties, *in vitro*, loss of, 1254
Nitrogen mustard,
effects on murine leukemia cell lines of different radiosensitivity *in vitro* of, 1401
intoxication, influence of serotonin antagonists on, 382
somatic effects on mice, 20
use in determination of blood and urine levels, 241
4-Nitroquinoline *N*-oxide, inhibitor of skin tumor initiation by 3,4-benzpyrene, 933
N,N′-Bis-(3-bromopropionyl) piperazine, (A-8103), polypoidy induced *in vivo* and *in vitro* in human leukocytes, 275
Novikoff ascites tumor,
dependence on time of rate-limiting factors in glycolysis of inorganic phosphate in, 1733
glycolysis, rate-limiting factors of inorganic phosphate in, 1733
inorganic phosphate, rate-limiting factors in glycolysis and transport of, 1733
transport, rate-limiting factors of inorganic phosphate, 1733
Novikoff hepatoma,
glycolysis, rate-limiting factors of inorganic phosphate in, 1733
inorganic phosphate, rate-limiting factors in glycolysis and transport of, 1733
relationship of thymidine to the metabolism of other pyrimidine nucleosides in suspension cultures derived from, 517
suspension cell cultures derived from, 499
thymidine uptake in suspension cultures derived from, 509
transport, rate-limiting factors of inorganic phosphate, 1733
***N*-Oxides,** purine, oncogenic derivatives of xanthine and guanine, 986
NSC-38280. *See* Phthalanilide (NSC-38280).
NSC-409962, 1,3-bis(2-chloroethyl)-1-nitrosourea, clinical trials with, 1876
NSC-57155. *See* Phthalamidine derivative (NSC-57155).
Nucleic acids,
effects of 1,3-bis(2-chloroethyl)-1-nitrosourea on synthesis *in vivo* and *in vitro* of, 1770
in intact and regenerating liver of rats, effects of actinomycin D on, 307
mammary glands, effect of actinomycin D on estrogen-induced changes in, 1854
mammary tumors, effect of actinomycin D on estrogen-induced changes in, 1854
metabolism of HeLa cells, action of 1-β-D-arabinofuranosylcytosine on, 698
uteri, effect of actinomycin D on estrogen-induced changes in, 1854
Nucleocytoplasm, ratios in different populations of rat liver parenchymal cells during azo dye carcinogenesis of, 1213
Nucleoli, isolation from human tumors, 225
Nucleoside. *See* Purine nucleoside.
Nucleotides, acid-soluble, in leukemic cells, 575
Nutrition, influence on liver catalase in animals, 34
Nutritional variants, Sarcoma 180, immunological studies, 29

Oncogenesis,
derivatives of guanine, 986
derivatives of xanthine, 986
effects of 4-(*p*-dimethylaminostyryl)-quinoline in mice, 938
nomenclature, 19th century advances, 75
pathology, tumor, 19th century advances, 75
theories, 19th century advances, 75
Oncology,
etiologic advances in 19th century, 75
induced transmissible sarcoma in hamsters, 107
morphologic advances in 19th century, 75
pathophysiologic advances in 19th century, 75
taxonomic advances in 19th century, 75
Organ, localization, effect on the fate of circulating cancer cells of trauma and, 1728
Oxidation, fatty acid, in transplantable liver tumors, 732
Oxidative patterns, terminal, in Barrett mammary adenocarcinoma, 647

P815Y leukemia. *See* Leukemia, P815Y.
Pancreatic acinar cells, effect of azaserine on fine structure of, 708
Papilloma,
bovine cutaneous, urinary bladder tumors induced by, 12
by hypervitaminosis A, inhibition of growth in Shope rabbit of, 947
virus, from bovine urinary bladder tumors, 840
Paralysis, incidence in Xenopus, 3
Parameters, of neoplasia, biochemical, 1238, 1244
Parasite,
interactions with host,
phagocytic capabilities of leukocytes from myeloproliferative and other neoplastic disorders, 1199
role of phagocyte in, 1199
Parenchymal cells, of rat liver, nucleocytoplasmic ratios during azo dye carcinogenesis in different populations of, 1213
Particulate fractions,
normal tissue, uptake of labeled proteins after injection into mice by, 865
tumor tissue, uptake of labeled proteins after injection into mice by, 865
Pathology,
chemical,
of interstitial fluid, 458
proteolytic activities in transplanted mouse tumors, 458
of kethoxal bis(thiosemicarbazone), 1417
tumor, 19th century advances, 75
Patients,
clinical investigation of the physiologic disposition of a phthalanilide (NSC-38280) and a phthalamidine derivative (NSC-57155) in 7, 402
with breast masses, use of serum protein-bound fucose in, 1779
with lymphoma mycosis fungoides,
skin autografts in, 1844
skin homografts in, 1844
with malignant hematologic diseases,
serum folate in, 1933
serum vitamin B_{12} in, 1933
with malignant neoplasia, individual specific leukocyte antigens in, 725,
with neoplastic disease, clinical and pharmacologic effects of combinations of 6-thioguanine and duazomycin A in, 1207
Peptides, of L-sarcolysin, effect on a spectrum of animal tumors of, Part 2, 494
Phagocyte,
in host-parasite interactions, role of, 1199
leukocytes from myeloproliferative disorders, capabilities of, 1199
leukocytes from neoplastic disorders, capabilities of, 1199
Pharmacologic effects, of combinations of 6-thioguanine and duazomycin A in patients with neoplastic disease, 1207
Phenothiazines, effects of protective systems against polycyclic hydrocarbons of, 365
L-Phenylalanine mustard, biochemical mechanism of action and distribution in tumor-bearing rats, 259
Phosphofructokinase, difference in activity in normal and malignant tumors of colon and rectum, 206
Phospholipids,
hepatic microsomal, effects of 4-dimethylaminoazobenzene, 118
metabolism in Ehrlich ascites tumor of, 1463
microsomal, dietary effects on fatty acid composition, 118
Phosphorylase, inosine, inhibition by 6-mercaptopurine of, 1925
Phosphorylation, of thymidine, some factors affecting it in transplantable rat hepatomas, 358
Phosphotransferases, glucose-adenosine triphosphate during hepatocarcinogenesis, 193
Photodynamics, some properties of the Rauscher mouse leukemia virus inactivated by, 624
Phthalamidine derivative (NSC-57155), clinical investigation of the physiologic disposition of in 7 patients, 402
Phthalanilide,
and deoxyribonuclei acid complexes, studies on formation of, 902
studies on relationship to chemotherapeutic activity of, 902
Phthalanilide (NSC-38280), clinical investigation of the physiologic disposition of in 7 patients, 402
Pituitary gland, luteinizing hormone levels during tumorigenesis of

estrogen-induced kidney tumors in golden hamster in, 1781

Plasmacytomas,
associated with ulceration, 53
resistant,
effects of alkylating agents *in vitro* and *in vivo* upon the thermal properties of deoxyribonucleic acids from, 410
studies with mustards, 410
sensitive,
effects of alkylating agents *in vitro* and *in vivo* upon the thermal properties of deoxyribonucleic acids from, 410
studies with mustards, 410

Polymerase system, of deoxyribonucleic acid, priming activity of deoxyribonucleic acid from normal and neoplastic human tissues in, 1238

Polypoid hyperplasia. *See* under Hyperplasia.

Polypoidy, induced *in vivo* and *in vitro* in human leukocytes with N,N'-bis-(3-bromopropionyl) piperazine (A-8102), 275

Polyribosome,
distribution of, in minimal deviation hepatomas, 1219
in rat tissues, distribution in minimal deviation hepatomas, 1219

Populations, of rat liver parenchymal cells, nucleocytoplasmic ratios during azo dye carcinogenesis in different, 1213

Postmenopause, excretion patterns of urinary metabolites of estradiol-4-^{14}C women with benign and malignant disease of the breast, 371

Potassium arsenite, induction of chromosome breaks in cultured normal human leukocytes by related compounds and, 980

Preneoplastic liver, assay of glucose-adenosine triphosphate phosphotransferases, 193

Primary immune response, in man by anti-metabolites, inhibition of, 997

Primer, activity of deoxyribonucleic acid from normal and neoplastic human tissues in a deoxyribonucleic acid polymerase system as, 1238

Profiles, metabolic, during carcinogenesis and related conditions in hepatic tissue, 833

Proliferative capacity, of L cells, effects of vinblastine on, 1232

Properties,
biochemical, of a new lactating mammary tumor line in rat, 286
morphologic, of a new lactating mammary tumor line in rat, 286

Protection, selective, of the gastrointestinal tract against radiation injury by perfusion with 2-mercaptoethylguanidine hydrobromide, 609

Protein,
effects of 1,3-bis(2-chloroethyl)-1-nitrosourea on synthesis of *in vivo* and *in vitro* of, 1770
fine structure of, in Ehrlich ascites tumor cell nuclei, 1035
labeled,
uptake by normal tissues after injection into mice of, 865
uptake by particulate fractions of tumor tissue after injection into mice of, 865
profiles of primary tumors and their lung metastases, 896
synthesis. *See* Synthesis, protein.

Proteolytic activities,
chemical pathology of interstitial fluid in transplanted mouse tumors, 458
in transplanted mouse tumors, 458

Purine,
metabolism of,
chromatographic studies of, 1925
inhibition of inosine phosphorylase by 6-mercaptopurine, 1925
N-oxides, oncogenic derivatives of xanthine and guanine, 986

Purine nucleoside analogs, metabolism of, 46

Pyridoxine,
deficiency, antitumor effects of methylglyoxal-bis(N^3-methylthiosemicarbazone) and their potentiation in animals with, 794
dietary deficiency, difference in selective antitumor effects, 153

Pyrimidines,
fluorinated, *in vivo* metabolism of 5-trifluoromethyluracil-2-^{14}C and 5-trifluoromethyl-2'-deoxyuridine-2-^{14}C, 377
metabolism, in tissue culture cells derived from rat hepatomas, 499, 509, 517

Rabbit, Shope, inhibition of growth of papilloma induced by hypervitaminosis A in, 947

γ-Radiation, additive cytotoxicity on diploid cell strains of, 760

Radiation,
atomic, comments on 1964 report of United Nations Scientific Committee on effects of, 1939
injury, selective protection of gastrointestinal tract by perfusion with 2-mercaptoethylguanidine hydrobromide against, 609
roentgen, enhanced response of Ridgway osteogenic sarcoma to actinomycin D combined with, 1002

Radioantibodies,
localization by radioautography in human brain tumors of, 779
localization in human brain tumors of, preliminary exploration, 773

Radioautography, localization of radioantibodies in human brain tumors by, 779

Radiomimetic chemicals, somatic effects on mice, 20

Radiosensitivity, *in vitro*, effects of nitrogen mustard and dimethyl myleran on murine leukemia cell lines of different, 1401

Rat,
absorption of tritiated methotrexate in, 1008
actinomycin D effects on nucleic acid and protein metabolism in intact and regenerating liver of, 307
age-dependent transplantability of virus-induced thymic lymphoma cultured *in vitro*, 132
albino, tris(*p*-aminophenyl)carbonium pamoate and tumor induction in, 1919
biochemical and morphologic properties of a new lactating mammary tumor line in, 286
carcinogenesis,
by 3-methoxy dyes, effect of dietary copper on, 1784
multiple skin tumors by painting with 3-methoxy-4-dimethylaminoazobenzene, 1784
chemical and histochemical study of effect of transplanted tumor upon activity of adrenal nicotinamide adenine dinucleotide phosphate diaphorase in, 552
distribution of tritiated methotrexate in, 1008
excretion of tritiated methotrexate in, 1008
folic reductase, enzyme activity of embryonic organs of, 1894
formation of adenomata in hypophyses of when subjected to both subtotal thyroidectomy and administration of ^{131}I, 1804
hepatoma induced by *N*-2-fluorenylacetamide,
differences between antibodies against dense sediment and microsome fractions of, 968
purification of localizing antibodies formed against microsomes of, 962
hepatoma,
patterns of glycolytic enzymes in, 671
pyrimidine metabolism in tissue culture cells derived from, 499, 509, 517
increase of enzymes in, 286
leukemias, effects of several forms of on the carbohydrate metabolism of the host, 1823
liver, base composition of high molecular weight nuclear ribonucleic acid of, 693
binding of 2-acetylaminofluorene to ribonucleic acid *in vivo* of, 1262
biochemical and autoradiographic study of the *in vivo* utilization of tritiated thymidine in regenerating, 1817
carbohydrate content in subcellular fractions of, 1225
effect of dietary 2-acetylaminofluorene on the uracil-degrading enzymes in, 703
effect of thioacetamide on adenylic acid deaminase activity and nuclear ribonucleic acid metabolism in, 596
latent ribonuclease during feeding of 2-acetamidofluorene in, 1913
parenchymal cell function during carcinogenesis, 67
parenchymal cells, nucleocytoplasmic ratios during azo dye carcinogenesis in different populations of, 1213

patterns of glycolytic enzymes in, 671
ribonuclease inhibitor during feeding of 2-acetamidofluorene in, 1913
selective alteration of rapidly-labeled ribonucleic acid synthesis during azo dye carcinogenesis in, 472
metabolism, effects of several forms of transplantable leukemias on the carbohydrate of, 1823
non-inbred, growth and function of thiouracil-induced thyroid tumors transplanted into, 423
prevention of adenomata in by feeding of desiccated thyroid, 1804
regenerating liver of, inhibition of deoxyribonucleic acid synthesis by hydroxyurea in, 1867
thymectomized at birth, growth and function of thiouracil-induced thyroid tumors transplanted into non-inbred, 423
tissues, polyribosome distribution in minimal deviation hepatomas of, 1219
transplantable hepatomas, some factors affecting the phosphorylation of thymidine by, 358
tumor-bearing,
biochemical mechanism of action and distribution of L-phenylalanine mustard-^{3}H, 259
enzymes related to glutamine metabolism in, 677
regional infusion of vinblastine and hydrogen peroxide in, 1839
Walker tumor, base composition of high molecular weight nuclear ribonucleic acid of, 693

Ratios, nucleocytoplasmic, in different populations of rat liver parenchymal cells during azo dye carcinogenesis, 1213

Rauscher mouse leukemia virus, some properties of the photodynamically inactivated, 624

Reagents, bifunctional cross-linking, in Ehrlich ascites tumor cell nuclei, 1035

Rectum, glycolytic enzymes in normal and malignant tissues, 206

Reduction, enzymatic, of *N*-hydroxy derivatives of 2-acetylaminofluorene and related carcinogens by tissue preparations, 1743

Regression, stimulated, strain specificity of Sarcoma 180 of, 859

Renal, hypertrophy, chemical aspects of compensatory, 1882

Research,
cancer,
19th century advances, 75
19th century foundations, 75

Resistance, to a rapidly and a slowly developing tumor in mice, 451

Respiration,
cell-free Sarcoma 37 ascites tumor preparation, 820
substrate utilization in a cell-free Sarcoma 37 ascites tumor preparation, 827

Response,
immunologic, influence of implant site of unconditioned Syrian hamsters to heterotransplantable human tumors on, 484
to methotrexate, of transplantable mouse tumors, 1899

Retention, at the injection site, carcinogenic activities of *N*-hydroxy-2-acetylaminofluorene and its metal chelates as a function of, 527

Reticuloendothelial system, involvement with liver catalase, 34

Reticuloendothelial tumors, relationship of ileocecal junction ulceration to development in mice, 53

Review, mechanism of liver catalase depression in animals, 34

Ribonuclease,
inhibitor, in rat liver during feeding of 2-acetamidofluorene, 1913
latent, in rat liver during feeding of 2-acetamidofluorene, 1913

Ribonucleic acid,
metabolism in rat liver, effect of thioacetamide on, 596
of liver of the rat, base composition of high molecular weight nuclear, 693
of rat liver *in vivo*, binding of 2-acetylaminofluorene to, 1262
of Walker tumor, base composition of high molecular weight nuclear, 693
studies in cultured human cells exposed to 8-azaguanine, 185
synthesis of rapidly-labeled, selective alteration of in rat liver during azo dye carcinogenesis, 472

Ribose moiety, esterification influence on phosphorylytic cleavage, 46

Ridgway osteogenic sarcoma, enhanced response to roentgen radiation combined with actinomycin D of, 1002

Roentgen, radiation, enhanced response of Ridgway osteogenic sarcoma to actinomycin D combined with, 1002

Rose bengal chromoexcretion, relationship with a carcinogen and a non-carcinogen, 67

L-**Sarcolysin.** *See also* L-Phenylalanine mustard.
peptides of, effect on a spectrum of animal tumors of, Part 2, 494

Sarcoma,
induced transmissible, in hamsters, 11-year observation through 288 passages, 107
Ridgway osteogenic, enhanced response to roentgen radiation combined with actinomycin D, 1002

Sarcoma 13, chickens with, serum lactate dehydrogenase of, 919

Sarcoma 37,
ascites tumor preparation,
glycolysis, 827
respiration, 827
substrate utilization in, 827
cell-free ascites tumor preparation,
glycolysis, 820
respiration, 820

Sarcoma 180,
immunological studies with nutritional variants of, 29
selective antitumor effects of 4-deoxypyridoxine and dietary pyridoxine deficiency, 153
stimulated regression of, strain specificity of, 859

Screening data,
on 234 chemicals, Part 2, 457
XXII, cancer chemotherapy, Part 2, 1
XXIII, cancer chemotherapy, Part 2, 207
XXIV, cancer chemotherapy, Part 2, 522
XXV, cancer chemotherapy, Part 2, 1077
XXVI, cancer chemotherapy, Part 2, 1253
XXVII, cancer chemotherapy, Part 2, 1433
XXVIII, cancer chemotherapy, Part 2, 1626
XXIX, cancer chemotherapy, Part 2, 1779

Serotonin, antagonists, influence on nitrogen mustard intoxication of 382

Serum,
folate, in patients with malignant hematologic diseases, 1933
protein, bound fucose in patients with breast masses, 1779
vitamin B_{12}, in patients with malignant hematologic diseases, 1933

Shope rabbit, papilloma by hypervitaminosis A, inhibition of growth of, 947

Skin,
carcinogenesis of, contribution of elemental sulfur and of organic sulfur compounds, 1759
effect of L-phenylalanine mustard on incorporation of radioactivity, 259
isolation of constituents, mouse epidermal cells and carcinogenesis, 161
rat,
effect of dietary copper on carcinogenesis by 3-methoxy dyes, 1784
multiple tumors by painting with 3-methoxy-4-dimethylaminoazobenzene, 1784
tumors,
by painting with 3-methoxy-4-dimethylaminoazobenzene, 1784
effect of dietary copper on rat carcinogenesis by 3-methoxy dyes, 1784

Small intestine, deoxyribonucleic acid, cold acid-soluble, and protein fractions, comparison of radioactivity distribution, 234

South African clawed toad. *See* Xenopus.

Specificity, basis for, mechanism of action of 6-mercaptopurine, 544

Spleen,
deoxyribonucleic acid, cold acid-soluble, and protein fractions, comparison of radioactivity distribution, 234
determination of catalase activity, 270
effect of L-phenylalanine mustard on incorporation of radioactivity, 259
lymphosarcomas, effect, 3

Squamous cell, mouse carcinoma, usefulness of tissue culture cell lines in development of ascites tumors from a transplantable, 444

Squamous metaplasia. *See* Metaplasia, squamous.
Steroids, cytotoxic, unique, cell culture studies with, 417
Strain specificity, of stimulated regression of Sarcoma 180, 859
Streptovitacin A, use in determination of blood and urine levels, 241
Structure, of KB cells in cell culture, effect of mitomycin-C on, 628
Study,
autoradiographic, of the *in vivo* utilization of tritiated thymidine in regenerating rat liver, 1817
biochemical, of the *in vivo* utilization of tritiated thymidine in regenerating rat liver, 1817
cell culture, with unique cytotoxic steroids, 417
chemical, of the effect of transplanted tumor upon activity of adrenal nicotinamide adenine dinucleotide phosphate diaphorase in rats, 552
electron microscopic,
of invasion of ascites tumor cells into the abdominal wall, 490
of mouse ascites tumors, E.L-4 and C1498, in susceptible (C57BL) and resistant (B10.D2) mice, 329
experimental, are sugars carcinogens?, 440
histochemical, of the effect of transplanted tumor upon activity of adrenal nicotinamide adenine dinucleotide phosphate diaphorase in rats, 552
with mustards, effect of alkylating agents *in vitro* and *in vivo* upon the thermal properties of deoxyribonucleic acids from sensitive and resistant plasmacytomas, 410
Subcellular fractions,
of rat liver, carbohydrate content in, 1225
of Walker 256 carcinosarcoma, carbohydrate content in, 1225
Sublines, amethopterin-treated, association of specific chromosome with dihydrofolate reductase activity, 246
Substrates,
of glycolysis, in intracranial tumors during complete ischemia, 432
utilization, in a cell-free Sarcoma 37 ascites tumor preparation, 827
Sugar moiety, influence on phosphorylytic cleavage, 46
Sugars, carcinogens and, an experimental study, 440
Sulfate-^{35}S, localization of, in human gastrointestinal carcinomas, 911
Sulfur,
elemental, contribution to carcinogenesis of the skin, 1759
organic compounds, contribution to carcinogenesis of the skin, 1759

Cancer Chemotherapy Screening Data XLI, No. 10, Part 2, 1779
Suspension cultures,
derived from Novikoff hepatoma,
relationship of thymidine to the metabolism of other pyrimidine nucleosides in, 517
thymidine uptake in, 509
Swiss mice. *See* Mice, Swiss.
Symposium,
conference on obstacles to the control of acute leukemia, 1469
epidemiologic approaches to cancer etiology, 1271
hormone-related tumors, 1053
Synthesis,
basement membranes, by epithelial tumors of the mouse, 656
deoxyribonucleic acid, inhibition in regenerating liver of rats by hydroxyurea of, 1867
hemagglutinin, inhibition by Cytoxan of, 745
nucleic acids, effects of 1,3-bis(2-chloroethyl)-1-nitrosourea *in vivo* and *in vitro* on, 1770
of rapidly-labeled ribonucleic acid, selective alteration in rat liver during azo dye carcinogenesis of, 472
protein,
effects of 1,3-bis(2-chloroethyl)-1-nitrosourea *in vivo* and *in vitro* on, 1770
studies in cultured human cells exposed to 8-azaguanine, 185
Synthetase activity, deoxythymidylate, of virus-infected animal cells, 737
Syrian hamsters. *See* Hamsters, Syrian.
Systems, protective against polycyclic hydrocarbons, effects of phenothiazines on, 365

Terephthalanilide, inhibition of leukemia P815Y *in vitro*, prevention by sulfonic and phosphoric analogs of, 469
Testes, effect of L-phenylalanine mustard on incorporation of radioactivity, 259
Thermal properties, of deoxyribonucleic acids from sensitive and resistant plasmacytomas, effects of alkylating agents *in vitro* and *in vivo* on, 410
Thioacetamide,
effect on adenylic acid deaminase activity in rat liver of, 596
effect on nuclear ribonucleic acid metabolism in rat liver of, 596
6-Thioguanine,
combined with duazomycin A in patients with neoplastic disease,
clinical effects of, 1207
pharmacologic effects of, 1207
combined with mitomycins, synergistic anti-neoplastic activity of, 1393
Thiosemicarbazide, selective antitumor effects, 153
Thiouracil, thyroid tumors induced by, transplanted into non-inbred rats thymectomized at birth, growth and function of, 423
Thymectomy,
at birth, growth and function of thiouracil-induced thyroid tumors transplanted into non-inbred rats, 423
effect of neonatal, influence on hepatic metastases, 993
effect on induction of tumors, 300
effect on transplantability of polyoma-induced tumors, 300
rats, non-inbred, growth and function of thiouracil-induced thyroid tumors transplanted into, 423
Thymidine,
phosphorylation of by transplantable rat hepatomas, some factors affecting, 358
relationship to the metabolism of other pyrimidine nucleosides in suspension cultures derived from the Novikoff hepatoma of, 517
tritiated, biochemical and autoradiographic study of the *in vivo* utilization of in regenerating rat liver, 1817
uptake in suspension cultures derived from the Novikoff hepatoma, 509
Thymidine-^{3}H, uptake of ^{125}I-labeled into tissues of mice bearing hepatoma-129, 234
Thyroid,
desiccated, prevention of formation of adenomata in hypophyses of rats subjected to both subtotal thyroidectomy and administration of ^{131}I by feeding of, 1804
tumors,
growth and function of thiouracil-induced, 423
transplanted into non-inbred rats thymectomized at birth, 423
Thyroidectomy,
subtotal,
formation of adenomata in hypophyses of rats subjected to both administration of ^{131}I and, 1804
prevention of formation of adenomata in hypophyses of rats by feeding of desiccated thyroid, 1804
Thyroxine, influence on distribution of amino acids in mouse pituitary thyrotropic tumors, 265
Tissue,
connective, effect of inhibitors from on growth of a series of human tumors *in vitro*, 387
hepatic, metabolic profiles during carcinogenesis and related conditions in, 833
human, enzyme patterns, glycolytic enzymes in normal and malignant tissues of colon and rectum, 206
human malignant, leukemia of short latency in mice injected by intrasplenic route with, 565
malignant, glycolytic enzymes of colon and rectum, 206

neoplastic human,
priming activity in a deoxyribonucleic acid polymerase system of deoxyribonucleic acid from, 1238
some macromolecular properties of deoxyribonucleic acid from, 1244
normal, glycolytic enzymes of colon and rectum, 206
normal human,
priming activity in a deoxyribonucleic acid polymerase system of deoxyribonucleic acid from, 1238
some macromolecular properties of deoxyribonucleic acid from, 1244
normal, uptake of labeled proteins after injection into mice by particulate fractions of, 865
rat, polyribosome distribution in minimal deviation hepatomas of, 1219
tumor, uptake of labeled proteins after injection into mice by particulate fractions of, 865

Tissue culture,
cell lines, usefulness of in development of ascites tumors from a transplantable squamous cell mouse carcinoma, 444

Tissue culture cells, derived from rat hepatomas, pyrimidine metabolism in, 499, 509, 517

Tissue preparations, enzymatic reduction of *N*-hydroxy derivatives of 2-acetylaminofluorene and related carcinogens by, 1743

Titanium sulfate, studies on estimation of catalase activity by the use of, 534

Toad, South African clawed. *See* Xenopus.

Toxicity, of kethoxal bis(thiosemicarbazone), 1417

Toxohormone, influence on liver catalase, 34

Transmissibility, glial tumors, fatty acid analysis by gas-liquid chromatography, 201

Transplantation,
growth and function, of thiouracil-induced thyroid tumors into non-inbred rats thymectomized at birth, 423
of mouse tumors,
chemical pathology of interstitial fluid in, 458
proteolytic activities in, 458
of thiouracil-induced thyroid tumors, growth and function of, 423
of virus-induced lymphoma in rats, 132
squamous cell mouse carcinoma, usefulness of tissue culture cell lines in development of ascites tumors from, 444
tumor, chemical and histochemical study of effect on activity of adrenal nicotinamide adenine dinucleotide phosphate diaphorase in rats on, 552

Transport, of inorganic phosphate, rate-limiting factors in DBAH$_1$ tumor, DBAG tumor, Novikoff hepatoma, and Novikoff ascites tumor in, 1733

Trauma,
effect on organ localization, 1728
effect on the fate of circulating cancer cells, 1728

Triethylene melamine, somatic effects on mice, 20

5-Trifluoromethyl-2′-deoxyuridine-2-^{14}C, *in vivo* metabolism of, 377

5-Trifluoromethyluracil-2-^{14}C, *in vivo* metabolism of, 377

Tris(*p*-aminophenyl)carbonium pamoate, and tumor induction in albino rats, 1919

Tumor,
allogenic, immunity in mice, diffusion chamber studies of, 1888
amino acid incorporating systems, further studies on, 318
and principles of *Croton tiglium* L., 1871
animal, effect of peptides of L-sarcolysin on, Part 2, 494
ascites. *See* Ascites tumors.
bovine urinary bladder, papilloma-like virus from, 840
brain, localization of radioantibodies in human, 773, 779
deoxyribonucleic acid, cold acid-soluble, and protein fractions, comparison of radioactivity distribution, 234
effect of L-phenylalanine mustard on incorporation of radioactivity, 259
effect of thymectomy on induction of, 300
effect of thymectomy on transplantability of polyoma-induced, 300
Ehrlich ascites cells,
deoxycytidylic acid deaminase in, 922
metabolism of phospholipids in, 1463
epithelial, synthesis of basement membranes in the mouse by, 656
experimental, effects of kethoxal bis(thiosemicarbazone) against, 1410
fibromatous, papilloma-induced in urinary bladder, 12
glial. *See* Glial tumor.
growth. *See* Growth tumor.
hormone-related, symposium on, 1053
human,
effect of inhibitors from adult connective tissue on growth of a series *in vitro* of, 387
heterotransplantable, influence of implant site on the immunologic response of unconditioned Syrian hamsters to, 484
isolation of nucleoli, 225
induction in albino rats, and tris(*p*-aminophenyl)carbonium pamoate, 1919
in mice, resistance to a rapidly and a slowly developing, 451
inocula, effect of delayed addition of irradiated cells to small viable, 355
interstitial water space of, 727
intracranial, substrates of glycolysis in during complete ischemia, 432
kidney,
estrogen-induced in golden hamster, 1781
luteinizing hormone levels in the pituitary gland during tumorigenesis in golden hamster, 1781
liver, ketogenesis in transplantable, 732
mice bearing glioma, hepatic lipids in, 957
mice, combined effect of cucurbitacins and x-ray treatment on, 1828
mouse,
ascites, electron microscopic studies of in susceptible and resistant mice, 329
pituitary thyrotropic, distribution of amino acids under influence of thyroxine, 265
transplanted, chemical pathology of interstitial fluid in, 458
transplanted, proteolytic activities in, 458
of cervix, inhibitory effect of vitamin A when induced by carcinogenic polycyclic hydrocarbons, 884
of forestomach, inhibitory effect of vitamin A when induced by carcinogenic polycyclic hydrocarbons, 884
ovarian, chemically-induced in mice, 20
primary, protein profiles of, 896
rapidly developing, resistance to in mice, 451
rats bearing, regional infusion of vinblastine and hydrogen peroxide in, 1839
rats with, enzymes related to glutamine metabolism in, 677
reticuloendothelial. *See* Reticuloendothelial tumors.

glycolysis, 820, 827
respiration, 820, 827
substrate utilization in a cell-free preparation of, 827
skin,
by painting with 3-methoxy-4-dimethylaminoazobenzene, 1784
effect of dietary copper on rat carcinogenesis by 3-methoxy dyes, 1784
initiated by 3,4-benzpyrene, 933
4-nitroquinoline *N*-oxide as inhibitor of, 933
slowly developing, resistance to in mice, 451
thyroid,
growth and function of thiouracil-induced, 423
transplanted into non-inbred rats thymectomized at birth, 423
transplantable liver, fatty acid oxidation in, 732
transplantable mouse,
level of enzyme activity of, 1899
response to methotrexate of, 1899
transplanted, chemical and histochemical study of effect on activity of adrenal nicotinamide adenine dinucleotide phosphate diaphorase in rats of, 552
urinary bladder, histopathology, induced by papilloma, 12

Tumor cells,
ascites, an electron microscopic study of invasion into the abdominal wall of, 490
circulating,
comparison of metastatic growth

produced by tumor cell emboli in veins and lymphatics, 324
fate of, 324
mammalian,
biologic and chromosomal instability of a cyclophosphamide-treated murine leukemia, 604
chemotherapeutic effects on, 604
resistant, metabolic effects of an antibiotic, NSC-51954, on, 477
susceptible, metabolic effects of an antibiotic, NSC-51954, on, 477

Tumor cell nuclei,
Ehrlich ascites,
bifunctional cross-linking reagents in, 1635
fine structure of protein in, 1635

Tumorigenesis,
estrogen-induced kidney tumors in golden hamster, 1781
luteinizing hormone levels in pituitary gland in golden hamster during, 1781

Tween 80, effects on the *in vitro* metabolism of cells of the Ehrlich-Lettré ascites carcinoma of, 764

Ulceration, chronic, ileocecal junction, relation to tumors in mice, 53

United Nations Scientific Committee, comments on 1964 report on effects of atomic radiation of, 1939

Uracil, effect of dietary 2-acetylaminofluorene on enzymes degraded by, 703

Urethan,
carcinogenesis, catabolism of urethan in young mice of varying age and strain and X-irradiated mice in relation to, 855
catabolism of,
in relation to urethan carcinogenesis, 855
in young mice of varying age and strain, 855
in X-irradiated mice, 855
influence on Xenopus, 7

Urinary bladder,
bovine, papilloma-like virus from tumors of, 840
mouse, absorption under carcinogenic conditions of ^{14}C-labeled 3-hydroxy-L-kynurenine and 3-hydroxyanthranilic acid from, 1432

Urine levels, antitumor agents, determination with cell culture methods, 241

Uteri, R3230AC, effect of actinomycin D on estrogen-induced changes in enzymes and nucleic acids of, 1854

Utilization, substrate, in a cell-free Sarcoma 37 ascites tumor preparation, 827

Veins, comparison with lymphatics of metastatic growth produced by tumor cell emboli in, 324

Viability, of HeLa cells, action of 1-β-D-arabinofuranosylcytosine on, 698

Vicia faba, effect of 9-β-D-arabinofuranosyladenine on chromosomes of, 1764

Vinblastine,
determination of blood and urine levels, 241
effects on the proliferative capacity of L cells and their progress through the division cycle of, 1232
regional infusion in tumor-bearing rats of, 1839

Virus,
deoxythymidylate synthetase and deoxythymidine kinase activities of animal cells infected with, 737
Moloney,
antibody response in mice inoculated neonatally with, 851
leukemia development in mice inoculated neonatally with, 851
papilloma-like, from bovine urinary bladder tumors, 840
Rauscher mouse leukemia, some properties of the photodynamically inactivated, 624
tumorigenic,
application of methods for determining response to biologically active compounds of, Part 2, 1609
methods for determining response to biologically active compounds of, Part 2, 1609
response to biologically active compounds of, Part 2, 1609

Vitamin A,
inhibitory effect on induction of tumors of cervix in Syrian hamster by carcinogenic polycyclic hydrocarbons of, 884
inhibitory effect on induction of tumors of forestomach in Syrian hamster by carcinogenic polycyclic hydrocarbons of, 884

Vitamin B_{12}, serum in patients with malignant hematologic diseases, 1933

Vitamin E, effect on carcinogenic amines on amino acid incorporation by liver systems, 124

Walker 256 carcinosarcoma, carbohydrate content in subcellular fractions of, 1225

Walker tumor, base composition of high molecular weight nuclear ribonucleic acid of, 693

Water space, interstitial, of tumors, 727

Women, postmenopausal, excretion patterns of urinary metabolites of estradiol-4-^{14}C in those with benign and malignant disease of the breast, 371

Xanthine, purine *N*-oxides, oncogenic derivatives of, 986

Xenopus,
lymphosarcoma, 7
spontaneous lymphosarcoma and other incidence in laboratory stock, 3

X-ray,
effect of on transplanted tumors in mice when combined with cucurbitacins, 1828
somatic effects on mice, 20
